CAPRI
CARE GUIDE

CAUTION & MAINTENANCE

The products of the COOLS range are designed to be long-lasting, made with materials featuring the highest quality standards and using environmentally friendly production processes. With a little care you can keep the products in good condition and prolong the life of your furniture. Follow the instructions for the materials to make sure that they stay in the best shape for as long as possible. The information below is only intended as a general guideline.

- The products in the CAPRI Collection are either made of corrosion-free powder coated stainless steel or steel with a two component coating, i.e. a KTL primer and a paint coating which provides a barrier to corrosive elements making it suitable for outdoor use. The coatings comply with the highest quality standards for both private and public environments.
- All products in the CAPRI collection are handcrafted and minor blemishes and imperfections may be visible. These are not considered defects and do not interfere with the quality and function of the product.
- To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate.
- It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Remove soap residue immediately using a clean, dry cloth. Avoid using scouring cream or scouring pads, as they may scratch the surface.
- Salt, limescale or acid (from coffee, wine, orange juice, tomato and lemon juice, etc.), sunscreen and bird droppings may discolour or corrode steel parts that are not cleaned immediately. Always remove stains quickly before they can do damage to the furniture.
- Stains left for a long time can become permanent.
- Rust is a normal phenomenon, but if not removed immediately, can chemically attack or corrode steel. Removing stains or rust:
 - Apply a specific non-abrasive detergent;
 - Test on a hidden stain/spot to make sure that the original surface finish is not altered;
 - Rub lengthwise (not in a circle);
 - Do not use abrasive pads;
 - Rinse thoroughly with clean water;
 - Finally dry thoroughly to prevent streaks
- DO NOT USE the following products which can corrode steel:
 - Bleach or detergents containing hydrochloric acid or products containing chloride
- Please be aware that the product will always be naturally affected by the surrounding environment it is exposed to, and that a certain amount of discoloration is to be expected. Especially prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating,
- We recommend cleaning and storing the products in sheltered places/cover them with a waterproof tarpaulin during prolonged periods of non-use and during the winter.

CAUTION & MAINTENANCE

- When you move your furniture, make sure you lift it rather than pulling or pushing it to avoid damaging the floor, legs and mountings.
- On tables, tighten up the screws after one to two months' use.
- Avoid improper use such as sitting on the back or armrests, tilting the seats on their back legs, putting your feet on the furniture or standing on it.
- Be careful not to scratch or damage the surface with sharp objects.
- Avoid partially covering the surface, for example with tablecloths, cushions or place mats, as colour variances may appear.
- Condensation and moisture may cause some white rust to appear, but this does not affect the product's life span and will eventually be washed away by rain or wind.
- Our painting process can cause tiny lumps and irregularities to appear on the surface. These are natural effects created during production that contribute to the product's finished appearance.
- Check the status of the floor protectors frequently and if worn down, contact your local retailer or COOLS to buy replacements. Their durability will depend on the surface the chair is placed on.
- Take care not to scratch the chairs against each other when stacking them. Do not move or drag the chairs around when stacked, as the weight will damage the legs. For information on how to (un)stack the products, read the instruction manual(s).

CUSHIONS

Our cushions are made with Sunbrella® fabric, suitable for outdoor use. For easy day-to-day maintenance of your Sunbrella fabric:

- Brush off loose dirt.
- Spray on a cleaning solution of water and mild soap.
- Use a soft bristle brush to clean.
- Allow cleaning solution to soak into the fabric.
- Rinse thoroughly until all soap residue is removed.
- Air dry.
- **IMPORTANT:** We recommend removing cushions from rain and storing the cushions in dry, sheltered places during prolonged periods of non-use and during the winter.
-  These care instructions apply for all our cushions:
- For more detailed information on how to care for your cushions, please visit <https://global.sunbrella.com/en-us/how-to-clean#>
